

## WHARF AND WAVE.

The U. S. S. Training ship Adams sailed for San Francisco yesterday forenoon.

The Australia brought one stowaway and a couple of Chinese actors, Ah Pook and Ah Chee, the latter on embarkation permits.

The schooner Kaula arrived from Laupahoehoe at an early hour Wednesday morning, bringing with her a cargo of firewood and 64 bags of coffee. The Kaula reports very rough weather on the way down from Hawaii.

The James Mabee will wait for reports of the condition of the weather in Kapa before she proceeds to the Garden Isle after sugar. All the latest reports of the weather, received by the Inter-Island boats, have been to the effect that it is impossible to work at that port.

The O. S. S. Alameda, Van Oterendorp commander, arrived in port at about 8 o'clock yesterday morning and hauled alongside the Pacific Mail wharf. She experienced fine weather from the Colonies. The Alameda brought 32 tons of general merchandise for this port.

The schooner Norma arrived from Kona early Wednesday morning with a cargo of 300 bags of coffee and firewood. She reports the very worst of weather after getting out to sea from Kailua, as well as a slight injury to the masting. All of her cargo was discharged very soon after arrival.

The American ship W. F. Babcock, R. D. Graham master, arrived in port Tuesday with a cargo of 3,150 tons of George's Creek coal from Baltimore. During the trip one of the sailors died. A heavy hurricane was met with in the Atlantic, but no damage was done. The captain is accompanied by his wife and child.

The Arago which had such a rough time of it on the trip from Westport, N. Z. to this port, is now alongside the Port street wharf discharging her cargo of coal which has been taken by Allen & Robinson. As soon as possible repairs to the damages sustained will be undertaken. Messrs. Sorenson & Lyle have been given the work of putting the vessel in shape.

The steamer Wailaleale arrived from Kaula ports Wednesday morning with a full cargo of sugar for various consignees. She reports very rough weather on the Garden Isle. Kilauea and Kapa are particularly bad. A very heavy sea was in the channel when the Wailaleale left. Kilauea has shut down for a few days for the purpose of putting in new machinery. The Ke Au Hou was weatherbound in Haemaui.

## WEATHER FORECAST.

Occasional Squalls in This Vicinity May be Expected.

U. S. Branch Hydrographic Office, San Francisco, Cal., Dec. 27, 1897. The following forecast has just been received from the Hydrographic Office, Washington, D. C.:

"The trade wind limits will probably be found a little farther south than clearly marked and the winds not so constant in direction as those last month.

"In the middle North Pacific ocean the average storm track for January is considerably south of that for December and the area of frequent gales may be expected to extend as low as the 30th parallel and reach across the entire ocean. North of the 40th parallel across the entire ocean, and north of the 35th parallel in the western part of the ocean, these gales may frequently be accompanied by hail or snow.

"During this month dangerous gales frequently visit that part of the ocean immediately to the westward of Vancouver Island and the coast of Washington and northern part of Oregon, this locality being the region across which the storms from the northern Pacific ocean most frequently pass upon entering on the African coast. In the small area and 50 deg. N. and longitude 125 deg. W. and 130 deg. W. for the month of January, covering a period of 10 years, one-fourth of the observations gave a force of wind 7 and above (Beaufort scale). Frequent squalls in the vicinity of the Philippine Islands and occasional squalls in the vicinity of the Hawaiian Islands may be expected.

"Typhoons are usually infrequent this month.

"After crossing the line coming north vessels may expect frequent squalls, with occasional thunder storms, in passing through the doldrums.

"Occasional fog and heavy mist will probably occur along the coast of the United States. The coasts of China and Japan may be expected to be comparatively free from fog during this month."

Lieut. U. S. N.

## JAPAN'S SHORTAGE OF COAL.

Prices Rapidly Advancing and Sales to Foreign Steamers Restricted.

TACOMA, December 13.—Captain McGregor, of the British steamer Glenloch, which has just arrived from Japan, reports that coal experts who have been making investigations as to Japan's coal supply declare that it cannot last 50 years longer. This is causing much uneasiness and has resulted in increased importations from Australia.

Captain McGregor reports that coal prices in Japanese ports have advanced 40 per cent in eight months, and that restrictions have been placed on its sale to foreign steamers. He wanted to load 1,200 tons to last him to Europe, but obtained only enough for the voyage to Tacoma.

China has coal mines, but the officials will not yet permit their development.

Mothers whose children are troubled with bad colds, croup or whooping-cough will do well to read what Dr. R. E. Robey, of Olney, Mo., says on this subject. He writes: "For years we have used Chamberlain's Cough Remedy, and always keep it in the house. It is regarded in our family as a specific for all kinds of colds and coughs. For sale by all druggists and dealers. Benson, Smith & Co., agents for Hawaiian Islands."

Notice to Ship Captains.

U. S. Branch Hydrographic Office, San Francisco, Cal.

By communicating with the Branch Hydrographic Office in San Francisco, captains of vessels who will co-operate with the Hydrographic Office by recording the meteorological observations suggested by the office, can have forwarded to them at any desired port, and free of expense, the monthly pilot charts of the North Pacific Ocean and the latest information regarding the dangers to navigation in the waters which they frequent.

Mariners are requested to report to the office dangers discovered, or any other information which can be utilized for correcting charts or sailing directions, or in the publication of the pilot charts of the North Pacific.

W. S. HUGHES,

Lieutenant, United States Navy.

The dredger will start in again on Monday after having been given a thorough overhauling.
